Introducing Fenesta LVL Doors

Fenesta's LVL Doors bring together elegant design and smart engineering—ideal for modern Indian homes. With sleek laminate finishes and clean edges, they offer a minimalist aesthetic and dependable performance.

Built with Laminated Veneer Lumber (LVL) Material, these doors feature wood veneers for superior strength, stability, and moisture resistance.

Pre-finished and installation-ready, LVL Doors eliminate on-site hassles and reduce project time. With durable construction and premium hardware, they're perfect for high-traffic, design-conscious spaces.

What sets Fenesta LVL Doors Apart

Driven by unique, innovative solutions, our doors are crafted to elevate your lifestyle. Fenesta doors are precision-engineered in our factory and professionally installed at your site, ensuring perfect dimensional accuracy and flawless finishes. This eliminates the hassle of coordinating with multiple vendors. Designed for exceptional performance, they also enhance the aesthetic appeal of your space. Here's what sets them apart:

Pleasing Aesthetics - Sleek finishes for modern interiors

High Load Bearing Capacity - Ideal for high-traffic zones

Weather Resistance - Withstands heat and humidity

Pre-Finished Panels - No polishing or painting needed

Branded Hardware - Smooth, secure, and long-lasting

Durable - Built from engineered, lasting materials

Scratch Resistant - Ideal for high-use areas

Customizable - Available in many sizes and styles

Construction & Materials

Frame Engineering

Fenesta LVL frames are made from high-density engineered wood, foiled with premium laminates for a refined look. They resist wear and maintain shape, while gaskets help reduce impact noise.

Available in standard sizes for easy installation.

- ❖ 100x40 mm
- ❖ 125x40 mm
- ❖ 150x40 mm
- ❖ Custom sizes available based on MOQ

Architraves

The architraves of LVL doors are foiled with elegant trims that frame the doors, creating a picture-frame effect and delivering a refined, seamless finish to your interiors.

Door Panel Construction

Engineered for strength and stability, the Fenesta LVL Door panel features a multi-layered construction for lasting performance and elegant design

Finishes: Available in solid laminate and texture laminate

Technical Specifications

Tested Performance

Water resistance:
Certified (as per lab test)

Termite resistance:
Compliant with project standards

Built to Endure: Passed impact test with just 0.052 mm (bottom) and 0.049 mm (top) indentation, and no damage under heavy shock.

Proven for Tough Use: Withstood glue adhesion, end immersion, slamming, and misuse tests with no visible damage.

Structurally Strong: Cleared buckling and screw withdrawal tests, ensuring long-term stability and secure hardware grip.

Sizes

Height: 2000mm (Min) to 2440mm (Max)

Width: 600mm (Min) to 1220mm (Max)

Panel Thickness Options

Standard: 35mm

Premium: 41mm
